DETAILED ACTION

Drawings

1. The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81. No new matter may be introduced in the required drawing. Fig. 1 has not been received in the applicant's amendment dated September 9th, 2004.

Claim Objections

2. Claim 8 is objected to because of the following informalities: on line 9, the word "termianls" is suggested to be changed to "terminals" for a typo error.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "each user channel" in line 17. There is insufficient antecedent basis for this limitation in the claim. The claim should recite the limitation with "each of a group of user channel".

Claim 1 recites the limitation “each signaling channel” in line 18. There is insufficient antecedent basis for this limitation in the claim. The claim should recite the limitation with “each of a group of signaling channel”.

Claim 1 recites the limitation "the network" in line 26. There is insufficient antecedent basis for this limitation in the claim. The claim should recite the limitation with “the local access network” to be persistent with its previous language.

Claim 1 recites the limitation "said network" in line 27 and line 38. There is insufficient antecedent basis for this limitation in the claim. The claim should recite the limitation with “the local access network” to be persistent with its previous language.

5. Claims 1-8 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Reason for Allowance

6. The following is an examiner’s statement of reasons for allowance:

Regarding claims 1-8, the prior arts fail to teach or suggest the method of providing access networks for mobile terminals (based on ATM technology) with providing fixed VPI on traffic channel and fixed VCI on the signaling channel of the virtual connection when a mobile terminal is in roaming from one base station to another base station. The invention discloses that when a mobile terminal is in roaming, the Virtual Path Identifier (VPI) of a sending user cell or traffic channel is fixed and its Virtual Circuit Identifier (VCI) is varied, in which means it could be modified. The invention also discloses that when a mobile terminal is in roaming, the

Virtual Path Identifier (VPI) of a sending signal cell or signal channel is varied, in which means it could be modified and its Virtual Circuit Identifier (VCI) is fixed, in combination with other limitations, as specified in the independent claim 1.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

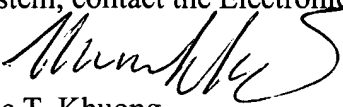

Kuelnel et al. (5,907,542); Petersen (6,574,221); Wang et al (US 5,875,185) are cited to show a System and Method of Access Network For Mobile Terminals.
